#### **Explanatory Note**

On February 28, 2024 Innoviz Technologies Ltd. (the "Company") announced the appointment of Mr. Avishay Moscovici as the Company's new Chief R&D Officer.

Mr. Moscovici will oversee the Company's hardware and software development activities, integrating the two departments and reorganizing the workstreams in a more efficient way that allows for faster product development and simplified customer planning across both hardware and software. Mr. Moscovici replaces Mr. Oren Buskila, who is stepping down from his Chief R&D Officer role to pursue a new opportunity outside of the LiDAR industry.

Mr. Moscovici joined the Company in 2017 and has led the development of its software and perception technologies, currently serving as the Company's VP of Software Engineering, reporting directly to CEO Omer Keilaf. Mr. Moscovici has over 25 years of leadership experience in cutting-edge technology development, specializing in chip design, modem technology, image processing, and baseband development over various networking architectures and the most advanced DSPs. Mr. Moscovici holds a BSc, an MSc, and an MBA from Tel-Aviv University, all Magna Cum Laude.

The following press release is furnished hereto:

Name: Eldar Cegla

Title: Chief Financial Officer

Date: February 28, 2024

#### Innoviz Reports Fourth Quarter and Full Year 2023 Results, Exceeding Revenue Guidance

- Full year 2023 revenues of approximately \$21M exceeded guidance with year-over-year growth of 246%
- Q4 2023 revenues of approximately \$15M exceeded guidance with 328% growth quarter-over-quarter and 846% growth year-over-year
- Strong revenue growth coupled with disciplined cost management led to the lowest quarterly cash burn since becoming a public company, finishing the year
  with approximately \$150 million in cash and equivalents

TEL AVIV, Israel, Feb. 28, 2024 /PRNewswire/ -- Innoviz Technologies Ltd. (Nasdaq: INVZ) (the "Company" or "Innoviz"), a leading Tier-1 direct supplier of high-performance, automotive grade LiDAR sensors and perception software, today provided commercial and strategic updates on its business, reported its financial results for the fourth quarter and full year ended December 31, 2023, and set 2024 commercial and financial targets.

"I am pleased with our strong finish to 2023, delivering revenues that were above the high end of both our quarterly and annual guidance range", said Innoviz CEO, Omer Keilaf. "The combination of strong revenues and disciplined cost management led to an impressive cash performance with our quarterly cash burn at just \$14.5 million, a record low since Innoviz became a public company. I believe this highlights the impact that growing revenues and cost discipline can have on our longer-term financial trajectory."

Keilaf added, "so far in 2024 we have shared exciting news on the customer front, unveiling our second Volkswagen program with the ID. Buzz at CES, and today's news that we are working on an additional InnovizOne deployment with BMW on the 5 Series in China. As we look to the rest of the year ahead, we continue to be very active with our RFI and RFQ pipeline and continue to believe that several additional customer wins are within reach. We continue to believe the LiDAR market will ultimately be a 'winner takes most' industry and that the next few customer decisions could provide us with continued momentum."

#### Commercial and Strategic Updates

- BMW i7 with InnovizOne available for sale now with deliveries planned March 2024 The BMW i7 with the InnovizOne powered Personal Pilot L3 package is currently available for sale in Germany with deliveries expected to begin in March 2024.
- Developing InnovizOne for new vehicle and geography with BMW—Innoviz has begun supporting software development specific to the Chinese market for a new deployment of the InnovizOne on BMW 5 Series vehicles in China working towards a commercial launch at a future date.
- Unveiled Volkswagen ID. Buzz light commercial vehicle program at CES—Innoviz unveiled the new ID. Buzz light commercial vehicle program at CES in January, marking the company's second program with the Volkswagen Group. Volumes from this program are incremental to the original series production award announced in 2022. The ID. Buzz is a light commercial vehicle aimed at the mobility market and will be a Level 4 program with multiple LiDAR per vehicle. A test fleet of vehicles is already on the road in Austin, Texas, and we expect the program will become increasingly visible as it progresses towards a planned 2026 commercial launch.
- Collaborating with Mobileye on the Volkswagen ID. Buzz Innoviz and Mobileye both displayed the new ID. Buzz light commercial vehicle program at CES, with both companies working together on the Level 4 technology. Innoviz is supplying the InnovizTwo long-range LiDAR, while Mobileye is working with Volkswagen as the autonomy platform partner, integrating the broader sensor suite and software stack. Innoviz views Mobileye as a strong partner and hopes to find additional opportunities to work with them on new platforms.

- Working towards additional growth opportunities with Volkswagen Group Innoviz continues to work to secure additional vehicles and platforms within the Volkswagen Group, in addition to its initial 2022 series production award and the recently announced ID. Buzz program.
- Customer decisions expected for late 2023 continue to progress in 2024 Several of the Company's RFQs that were in the later stages and were expected to be completed by the end of 2023 continue to make progress, despite decision timelines having been pushed into 2024.
- Strategic realignment In late January 2024, Innoviz announced a strategic realignment that refocused the cost structure of the InnovizOne program after its transition into series production. The Company also announced a concentration of future investments on the InnovizTwo sensor and software platform and used the realignment as an opportunity to integrate its hardware and software development units into a combined R&D department. These realignment actions are expected to be completed during the first quarter of 2024 and to reduce planned cash outlays by \$22-24 million on an annualized basis.
- New slim profile design for InnovizTwo Innoviz unveiled a new, slimmer profile design for the InnovizTwo that can reduce the height of the sensor from 45mm to as small as 25mm. The new design was created for a pipeline customer and can be particularly useful for customers exploring behind the windshield and rooftop LiDAR deployments.

#### Fourth Quarter 2023 Financial Results

Revenues in Q4 2023 were \$14.9 million, up 328% compared to revenues of \$3.5 million in Q3 2023 and up 846% compared to revenues of \$1.6 million in Q4 2022. The strong revenue growth came from a combination of NRE services, production units and sample shipments.

Operating expenses in Q4 2023 were \$29.5 million, an increase of 6% compared to operating expenses of \$27.8 million in Q3 2023, and a year-over-year decrease of 12% compared to \$33.5 million in Q4 2022. Operating expenses for Q4 2023 included \$5.5 million of share-based compensation compared to \$5.3 million of share-based compensation in Q4 2022.

#### Full Year 2023 Financial Results

**Revenues** in 2023 were \$20.9 million, up 246% compared to revenues of \$6.0 million in 2022. The strong revenue growth resulted from a combination of NRE services, production units and sample shipments, and was partially offset by the transition from sample pricing to production pricing with the BMW program shifting into series production.

**Operating expenses** in 2023 were \$121.0 million, a decline of 3% compared to operating expenses of \$124.6 million in 2022. Operating expenses for 2023 included \$20.7 million of share-based compensation compared to \$19.3 million of share-based compensation in 2022.

Liquidity as of December 31, 2023 consisted of approximately \$150.2 million in cash and cash equivalents, short term deposits, short term restricted cash and marketable securities. The combination of stronger revenues and disciplined cost management resulted in the lowest quarter-over-quarter cash burn in the Company's history as a public company at only \$14.5 million (net cash used in operating activities and purchase of fixed assets).

#### 2024 Financial and Operational Targets

The Company is establishing initial targets for Q1 2024 and FY 2024:

- Secure 2-3 additional customer programs in 2024
- Secure \$20-70 million of new NRE bookings in 2024
- Q1 2024 revenues are expected to be in the range of \$5-6 million (+395-494% YoY)

After initially guiding 2023 revenue targets too cautiously, Innoviz is shifting to quarterly revenue targets. There are many factors that can influence full year numbers that can be difficult to predict this early in the year, and the Company believes quarterly guidance will ultimately be a more prudent and accurate way to approach revenue targets at this point in the Company's growth curve.

#### **Conference Call**

Innoviz management will hold a web conference today, February 28, 2024, at 9:00 a.m. Eastern time (6:00 a.m. Pacific time) to discuss commercial and strategic updates, financial results for the fourth quarter and full year 2023 and 2024 financial and operational targets. Innoviz CEO Omer Keilaf and CFO Eldar Cegla will host the call, followed by a question-and-answer session.

Investors are invited to attend by registering in advance here. All relevant information will be sent upon registration.

A replay of the webinar will also be available shortly after the call in the Investors section of Innoviz's website for 90 days.

#### About Innoviz Technologies

Innoviz is a global leader in LiDAR technology, serving as a Tier 1 supplier to the world's leading automotive manufacturers and working towards a future with safe autonomous vehicles on the world's roads. Innoviz's LiDAR and perception software "see" better than a human driver and reduce the possibility of error, meeting the automotive industry's strictest expectations for performance and safety. Operating across the U.S., Europe, and Asia, Innoviz has been selected by internationally recognized premium car brands for use in consumer vehicles as well as by other commercial and industrial leaders for a wide range of use cases. #### Forward Looking Statements

This announcement contains certain forward-looking statements within the meaning of the federal securities laws, including statements regarding the services offered by Innoviz, the anticipated technological capability of Innoviz's products, the markets in which Innoviz operates, Innoviz's projected future operational and financial results, including revenue and non-recurring engineering (NRE) bookings. These forward-looking statements generally are identified by the words "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," "will be," "will continue," "will likely result," and similar expressions. Forward-looking statements are predictions, projections and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. "NRE (Non-recuring Engineering) bookings" is booked services that may be ordered from Innoviz usually as part of a program design win and includes, among other things, application engineering, product adaptation services, testing and validation services, standards and qualification work and change requests (usually during the lifetime of a program). The commitment for a certain NRE is usually provided around the design win and may be paid based on milestones over the development phase of the project which may take a few years.

Many factors could cause actual future events, and, in the case of our forward-looking revenue and NRE bookings, actual orders or actual payments, to differ materially from the forward-looking statements in this announcement including but not limited to, the ability to implement business plans, forecasts, and other expectations, the ability to convert design wins into definitive orders and the magnitude of such orders, the possibility that NRE would be set off against liabilities and indemnities, the ability to identify and realize additional opportunities, potential changes and developments in the highly competitive LiDAR technology and related industries, and our expectations regarding the impact of the evolving conflict in Israel to our ongoing operations. The foregoing list is not exhaustive. You should carefully consider such risk and the other risks and uncertainties described in Innoviz's annual report on Form 20-F for the year ended December 31, 2022 filed with the U.S. Securities and Exchange Commission ("SEC") on March 9, 2023, in Innoviz's annual report on Form 20-F for the year ended December 31, 2023 to be filed with the SEC and in other documents filed by Innoviz from time to time with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Innoviz assumes no obligation and does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise. Innoviz gives no assurance that it will achieve its expectations.
